Organizers and Partners:

## A New Era in the Development of the Electrical Industry of Central Asia

The electrical industry and innovative technologies are becoming one of the main vectors of the economy of Uzbekistan. In 2024, more than 200 projects will be launched in this direction. In particular, the President of Uzbekistan instructed to provide full support to the electrical industry in the Republic, and also pointed out the need to create new local brands and attract foreign companies to manufacture world-class products, fully ensure the domestic market and expand exports to Eurasian countries.

## SECTIONS OF THE EXHIBITION:

- Technologies and equipment of the electrical industry
- Electromechanical and electronic components
- Cable, conductors
- Power electronics Automation systems
- Robotics
- Digital technologies
- Household appliances and electronics
