**The 4th International Exhibition of Electronics,
Electrical Engineering and Innovative Technologies**

11-13 November, 2025

icaevents

E-TECH
EXPO

The exhibition covers the key areas of electrical engineering industry, electronics, automation, robotics, control systems, and digital solutions. It also serves as a vital link in the country's technological transformation, bringing together domestic and international manufacturers, developers, distributors, industry experts, startup representatives, and government institutions.

Strategic Importance:

Held amid the active modernisation and digitalisation of Uzbekistan's industrial sector, **E-TechExpo 2025** has become an essential instrument for driving technological progress, implementing energy-efficient solutions, and building up a high-tech manufacturing ecosystem.

Established: 2022

Participant Feedback

Stego Elektrotechnik GmbH

The company showcased its products on the Uzbek market for the first time and received strong interest in German quality and in electronic thermal protection solutions. We have already established numerous contacts with local specialists, as well as with visitors from Pakistan and India, which have been inspiring and have opened up opportunities to reach a new target audience. This is a new and rapidly developing market, and we are eager to be part of it. We see E-TechExpo as an important event for our company.

**Moritz Schenk,
Area Sales Manager**

Unitree

We believe that in the coming years, Uzbekistan and Kazakhstan will become important markets for industrial development. That is precisely why we are here — we see expanding opportunities, particularly in industrial sectors such as mining and exploration. This will enable us to introduce more humanoid robots and robotic dogs to the Uzbek market.

**Jovi Liu,
Sales Manager**

Maybo

The potential in Uzbekistan is currently tremendous, and many companies are eager to work here. One of the key advantages of the exhibition is that all the major clients we aimed to meet and showcase our equipment to were present — including the country's leading mining and metallurgical plants, as well as representatives of the aerospace sector. Our stand attracted specialists from all regions of Uzbekistan, along with visitors from Tajikistan, Afghanistan, Russia, Belarus, and China. The exhibition delivered excellent results, and we are fully committed to participating again.

**Sergey Yakunin,
Director**

Elecond JSC

Uzbekistan's market is rapidly advancing in the production of electrical capacitors, supercapacitors, and related modules. We are impressed by the cutting-edge products already being manufactured in the country — this is precisely why we chose to be here and strengthen our cooperation. The openness, friendliness, and eagerness to build partnerships made our discussions especially productive. We plan to return again next year.
